Box Model in CSS

Muhammad Mohsin

A box that **wraps** around every HTML element. It consists of:

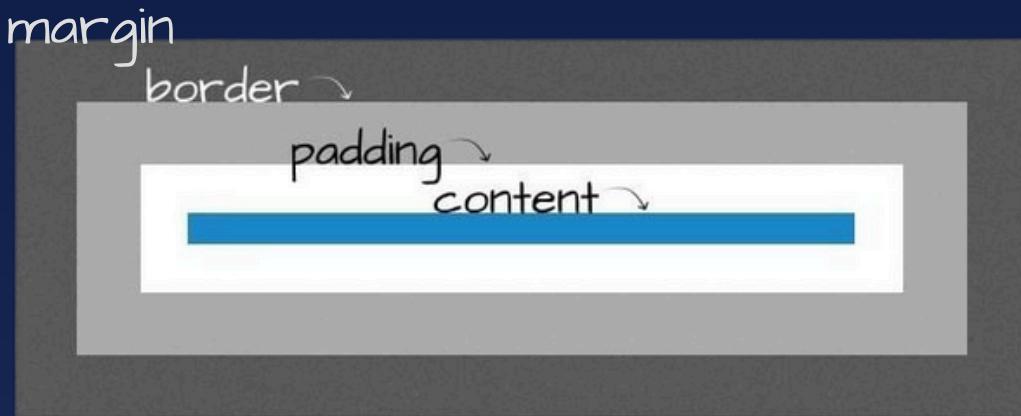

Margins

Borders

Padding

Actual content.

CSS determines the **position, size, and style** of a box.

Muhammad Mohsin

Margin

The outermost area of a box. It enforces the **distance** (empty space) a box wants to have from its surrounding **neighbors**

Border

The border is the outer edge of the element and sits **inside the margin**.

Padding

The empty **space inside of an element** between the edge (border) and the content of the element.
